

Weaving a Danish Corded Seat

Suggested Materials List

Instructor: David Bohnhoff

This course provides the student with the stool and basic materials needed to create your own Danish corded seat. However, we do ask that you bring a few basic tools!

As for the supplies from the students I asked each student to bring a few simple tools.

Supply List:

- small square (adjustable if possible)
- ruler or tape measure
- pencil
- cordless drill
- set of small drill bits
- small hammer and nail set
- scissors

Many of you may already have these at home or can borrow them. You can also find these items at any hardware store.
